

## Petition: Reject SB 171 and Similar Bills Dismantling Local Regulations

We, the undersigned, SB 171 or any similar bill that strips away the power of local officials to protect residents, businesses, and farmers from harmful land use. We firmly believe decisions about land use in our neighborhoods and communities should be made locally, not in Charleston.

These "dismantle local regulation bills" threaten our property value, our health, local resources such as water and roads, the safety of the environment, and overall quality of life. By centralizing power at the state level, these bills promote big state government, infringing on the rights of citizens.
